50 years of technological innovation

Ever since its origins, Callaghan has been absolutely committed to technological innovation and counts with the know-how acquired in more than 50 years of experience to create products that blend technology with craftsmanship and comfort with design.

We are always looking for new designs, new materials, new manufacturing techniques that will allow us to continue offering to our customers products with added value that provide a unique walking experience.

This is how we have developed the internationally patented Callaghan Adaptaction technology “it adapts to your feet” which is constantly evolving thanks to our strategy of differentiation through research and technological innovation.

5 to 8 mm width increase

It adapts to the foot sole
and its width increase

The Adaptation Technology is the result of exhaustive research on the foot anatomy. The innovative design of the Adaptation patented outsole replicates the movement of the human foot and it adapts to the foot's natural motion.

Callaghan Adaptation Technology. It adapts to your feet

The Callaghan Adaptation Technology has revolutionized the market thanks to the benefits it provides as well as the personality of the outsole design based on the foot's natural motion optimization.

Callaghan Adaptation, it adapts to the foot sole and the width increase it experiences during walking.

Our factories and materials

Callaghan shoes are manufactured in our factories located in Amedo-Spain and are formed by skilled labor force keeping the craftsmanship style. The fact that the factories are our own, gives us absolute control of the manufacturing process as well as quick response capability.

The leathers and materials used for the Callaghan Collections are of the highest quality and are subject to strict quality controls. The patented outsoles are made of last generation flexible and extra light materials, developed after extensive technological research to provide maximum comfort.

Callaghan, fully committed to protecting the environment

Callaghan, fully committed to protecting the environment

CO2 Neutral footprint.

Our goal is to do everything we can to minimize the environmental impact that may result from our activity.

We fully support and promote sustainable development.

Our manufacturing plants use 100% renewable energy and we are constantly optimizing our facilities to reduce the water and energy consumption.

Our philosophy to protect the environment is reinforced by the development of our own project to absorb the CO2: a forest named "Callaghan02", 6 hectares planted with 30,000 trees.

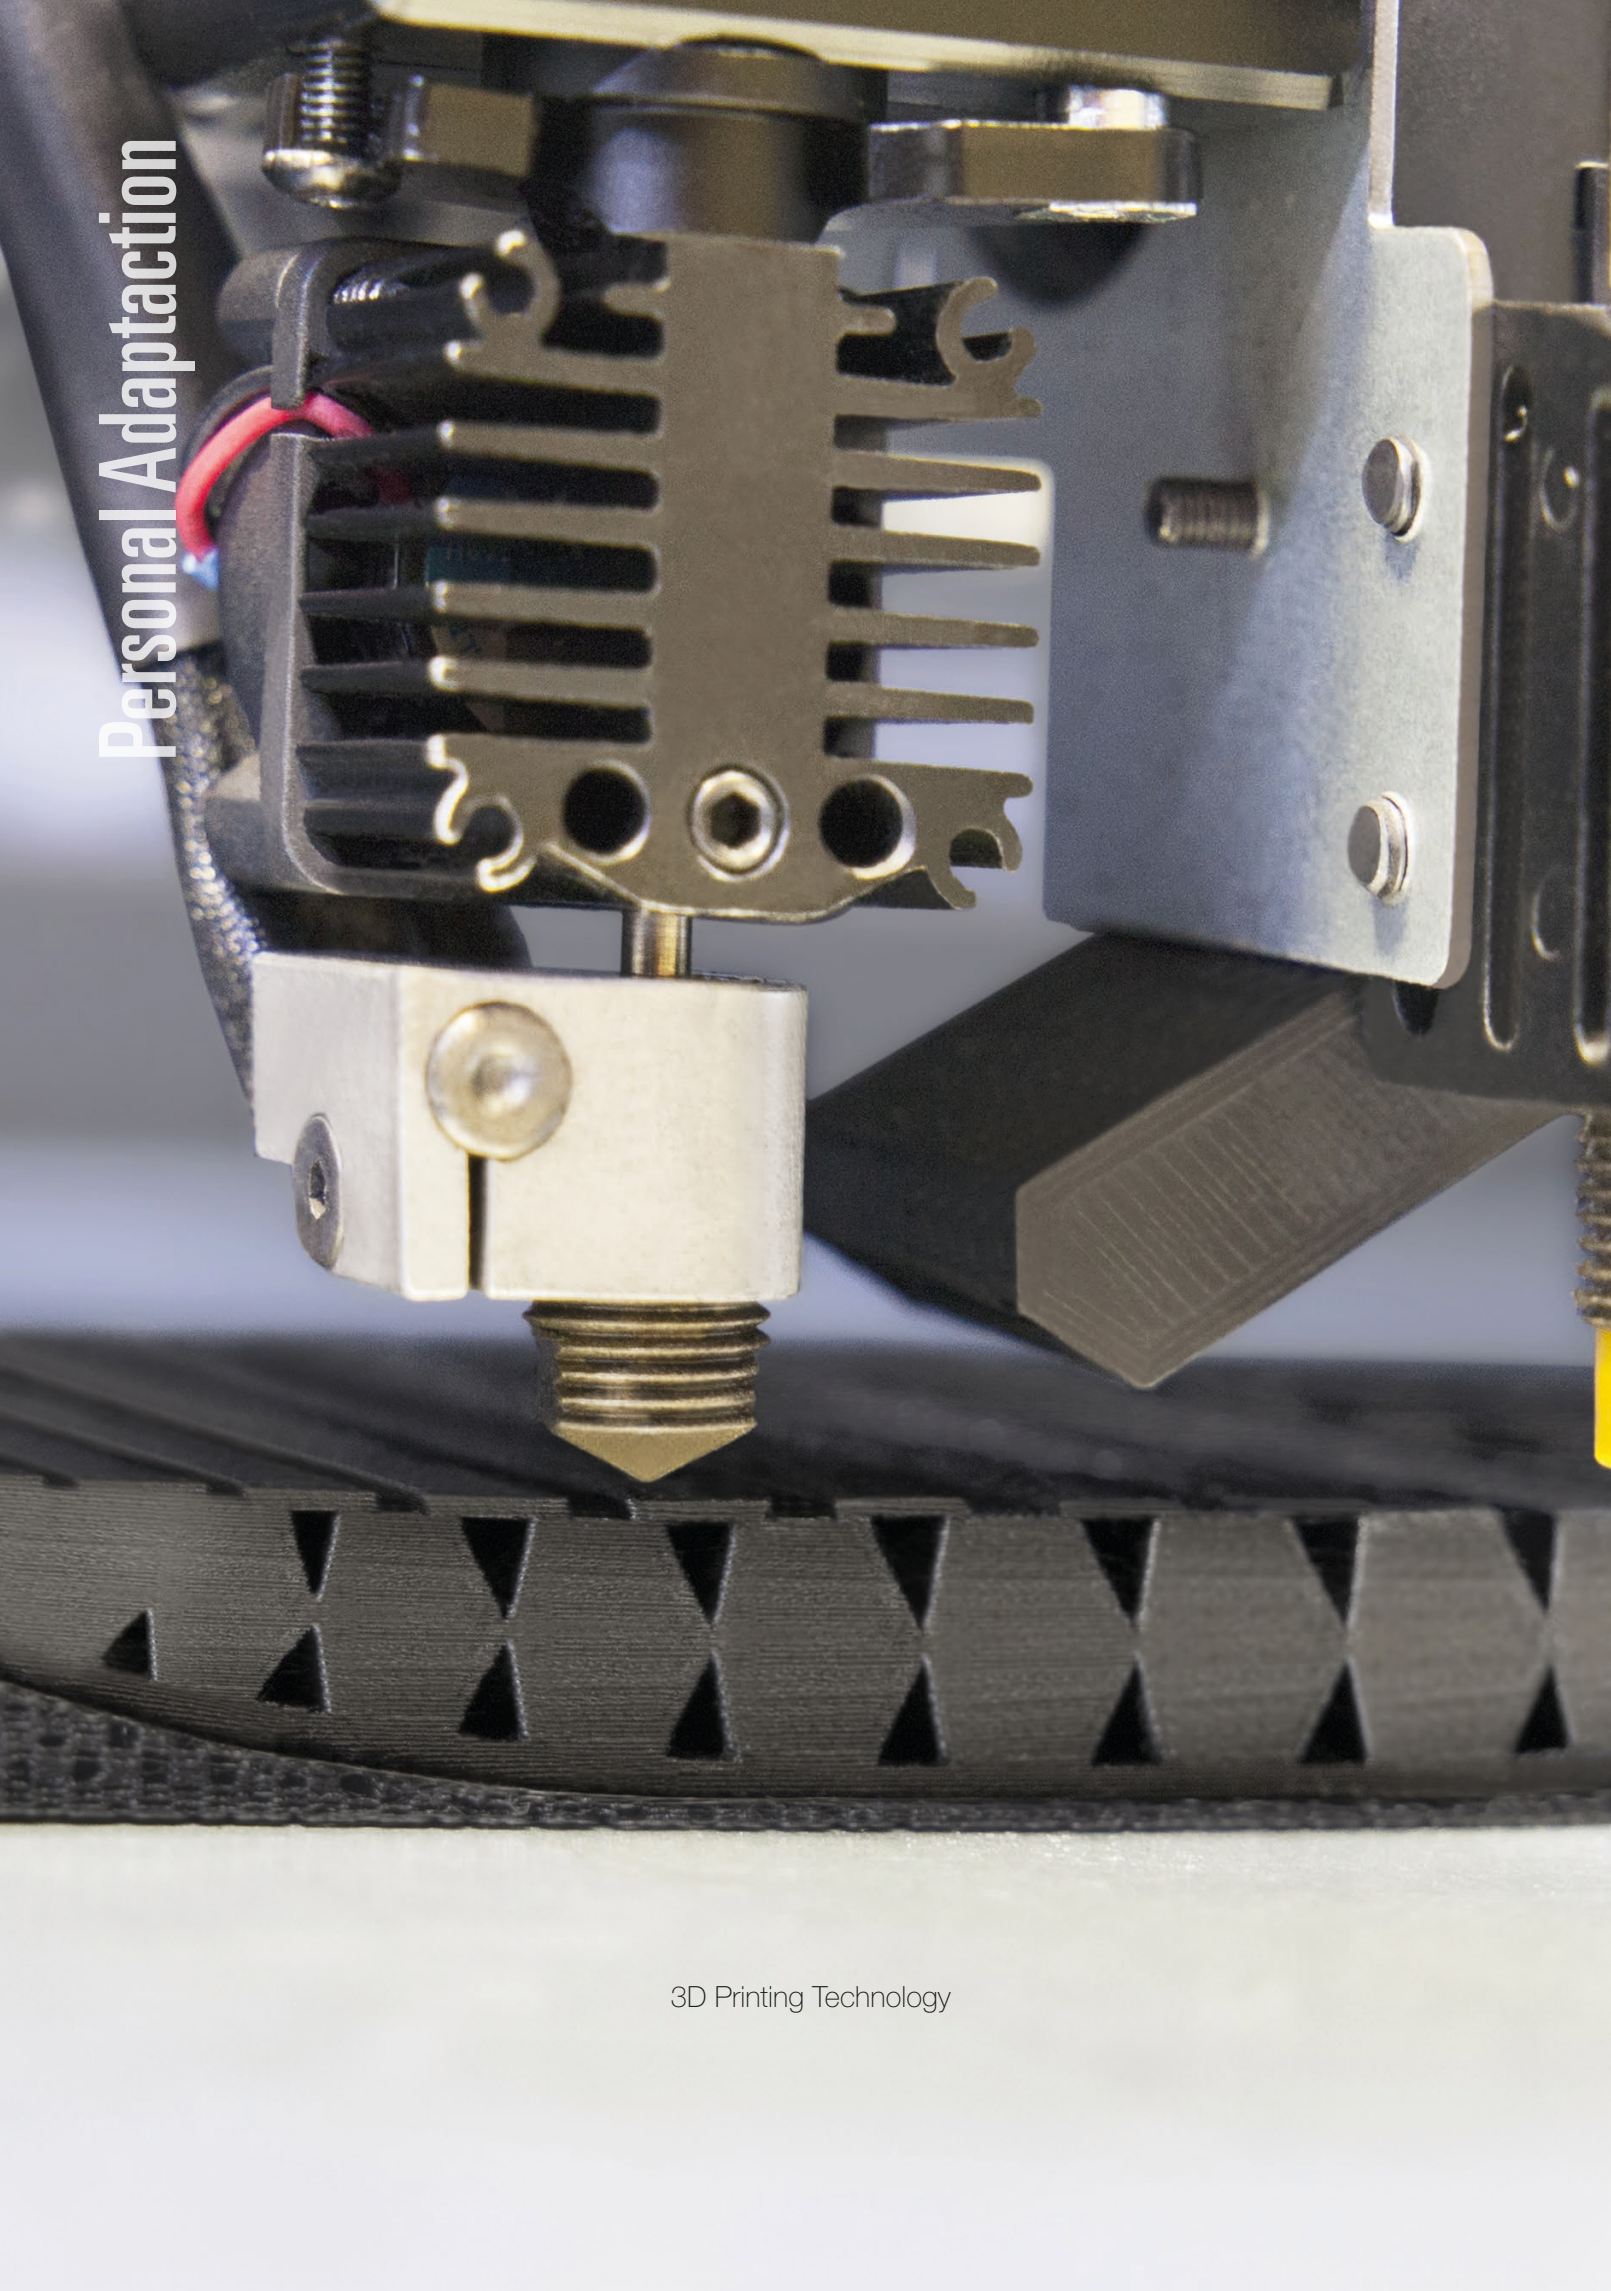

With this forest we have managed to compensate all our CO2 emissions to the atmosphere so we have become a carbon neutral company.

3D Printing Technology

CallagHan
Adaptation »

Personal Adaptation:
3D printing technology that adapts to your weight

The original concept of Callaghan Adaptation is to create a shoe that adapts to every person. Based on that premise, the Adaptation Personal is a step forward as it adapts also to your weight.

Thanks to the 3D printing technology, Personal Adaptation allows us to manufacture the first customized shoe in line with each person’s weight, providing maximum comfort.
